

Project Initialization and Planning Phase

Date	4 July 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

I am	I'm trying to	But	Because	Which makes me feel
A Policy Researcher	Accurately predict HDI levels.	Manual calculations are error-prone.	Socioeconomic data is complex.	Anxious about data precision.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A Policy Researcher	Accurately predict HDI levels for a country.	Manual calculations are time-consuming and prone to errors.	Socioeconomic data (GNI, Education, Life Expectancy) is vast and complex.	Overwhelmed and uncertain about the accuracy of the manual results.
PS-2	A Student/Academic	Understand the correlation between socioeconomic factors and Well-being.	Use a simple tool to get instant insights.	Existing tools are too technical or require advanced data science skills.	Frustrated by the high learning curve of data analysis software.
