Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	Represents the user (e.g., Policy Researcher) who interacts with the system.
Rectangle with numbered header	Process	Represents system actions (e.g., 1.0 Data Input, 2.0 HDI Calculation).
Rectangle (solid fill, no number)	Data Store	Represents the storage (e.g., Socioeconomic Database) where data is saved.
Labeled arrow	Data Flow	Shows the direction of data movement between entities and processes.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
